FACULTY OF MEDICINE

The

Embracing the legacy of Avicenna

Honoring the timeless wisdom of Avicenna, we strive to integrate comprehensive approach of Avicenna to healthcare with modern medical advancements.

Reviving the Historic hub of Medicine....

M.B.B.S. Program Bachelor of Medicine, Bachelor of Surgery

The MBBS program at AIU is structured over five years, followed by a one-year compulsory internship. The first two years focus on preclinical subjects, such as anatomy, physiology, and biochemistry, laying the foundation for your medical education. The next three years are dedicated to clinical subjects, with clinical rotations in various clinical specialties. The final year of internship provides hands-on experience in hospitals, where you will apply your knowledge and skills in real patient care settings.

M.D. Program Doctor of Medicine

Our MD program spans six years, with the first three years focused on preclinical studies, where you will build a strong foundation in the basic sciences. The next three years involve intensive clinical training, with rotations in various medical specialties, allowing you to apply your knowledge in real-world settings. The final year is dedicated to advanced clinical practice and preparation for licensing exams.

Our Campuses

Campus No 1

Campus No 2

Our university is rapidly growing, with five campuses already established in Bukhara. We have exciting plans for even more campuses, which will allow us to offer a wider range of programs and better facilities.

Campus No 5

Our goal is to create a vibrant academic community that meets the needs of our students and prepares them for the future.

Campus No 3

Campus No 4

Curriculum: Study Plan

The study plan at Asia International University is approved by the Ministry of Higher Education, Science and Innovations and also aligns with international European standards as per the World Health Organization (WHO) guidelines, ensuring that the education provided meets global health education standards and expectations. Here's an elaborate breakdown:

This cycle likely includes courses like Russian language, Latin language, Medical Philosophy and History of Uzbekistan that cover understanding cultural, social, and economic contexts of medicine and of the country where the student will be spending. These courses aim to develop soft skills and a broader understanding of societal dynamics, which are crucial for any medical professional in dealing with local patients from diverse backgrounds.

Natural Science Cycle:

Subjects in this cycle are focused on fundamental sciences that underpin medical knowledge, such as biology, chemistry, and hygiene. These are essential for developing a strong foundation in understanding the human body and its functions.

Basic Medicine:

Emphasizes core medical knowledge necessary for all medical practitioners, which might include anatomy, physiology, pathology, and pharmacology, microbiology, biochemistry and Immunology and parasitology.

Clinical Blocks:

Block Therapy: Focused on therapeutic related subjects and their applications.

Block Pediatrics: Covers pediatrics and childhood diseases and medical care specific to children.

Block Surgery: Provides in-depth knowledge and skills related to surgical procedures.

Block Obstetrics and Gynecology: Focuses on women's reproductive health, childbirth, and associated medical conditions.

Qualification Hospital Practical:

Practical qualifications in a clinical hospital setting are essential for preparing healthcare professionals to meet the challenges of patient care effectively. It Provides hands-on experience in a hospital setting, essential for applying theoretical knowledge in real-world scenarios and developing practical skills.

Our Medical Students undergo clinical rotations in our 46 affiliated hospitals including own hospital

We foster a comprehensive educational environment that develops clinically skilled healthcare professionals ready to make a meaningful impact in the medical field.

46 affiliated hospitals including our own.

Ensuring The Practical Knowledge And Skills

AIU makes sure students gain real-world skills by combining classroom lessons with practical experiences, so they're ready to confidently succeed in their careers.

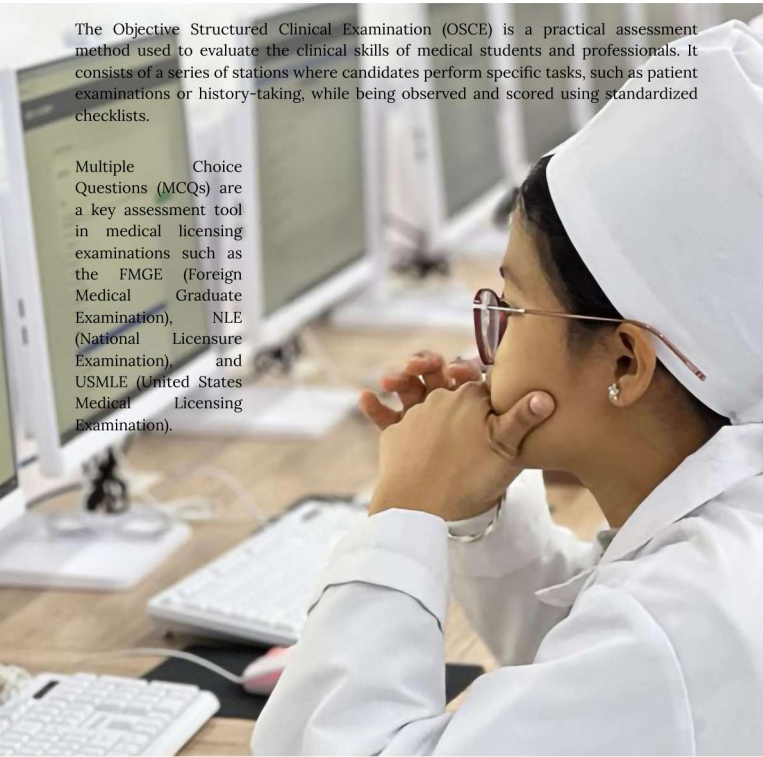

EXAMINATION SYSTEM

OSCE, OSPE, MCQS

The Objective Structured Practical Examination (OSPE) is a method used to assess practical skills in a structured and objective manner. It consists of various stations where candidates perform specific practical tasks, such as laboratory techniques or clinical procedures.

The Objective Structured Clinical Examination (OSCE) is a practical assessment method used to evaluate the clinical skills of medical students and professionals. It consists of a series of stations where candidates perform specific tasks, such as patient examinations or history-taking, while being observed and scored using standardized checklists.

Multiple Choice Questions (MCQs) are a key assessment tool in medical licensing examinations such as the FMGE (Foreign Medical Graduate Examination), NLE (National Licensure Examination), and USMLE (United States Medical Licensing Examination).

Infrastructures

Our university leverages advanced infrastructure with strong IT networks and smart classrooms, creating an environment conducive to digital learning and research. The library offers extensive digital resources and collaborative spaces, fostering information literacy and teamwork. Well-equipped labs provide hands-on learning with advanced equipment, enabling students to apply theoretical knowledge to practical challenges. Simulation centers offer realistic training environments for various fields, ensuring students gain practical experience and are well-prepared for their future careers.

Medicine: Using
Modern
Technologies

Asia International University is committed to providing its medical students with a cutting-edge education. As part of this commitment, we plan to integrate VR specs and 3D models into our curriculum to enhance visualization and understanding of complex anatomical structures. This will foster interactive learning through hands-on manipulation and safe, realistic simulations of medical procedures, ultimately improving student engagement and motivation. By embracing these technologies, Interma of Asia International University aims to prepare its students for the future of medicine and offer accessibility and flexibility in learning.

A man with dark hair, a mustache, and glasses is wearing a white lab coat over a blue and white plaid shirt. He is looking off to the side with a thoughtful expression. In the foreground, there is a stack of several books. The spines of the books are visible, with some text like 'USMLE STEP 1' and 'USMLE STEP 2' partially legible. The background is a blurred clinical setting with a white wall and a blue stripe.

Family Like Atmosphere

AIU distinguishes itself as more than just a university; it's a family that prioritizes the holistic well-being of its students. Beyond academics, AIU cultivates a nurturing environment where students receive comprehensive care, including quality food and accommodation, a secure environment, and prioritized health services, ensuring their comfort, safety, and physical and mental well-being, all of which are essential for their academic success and personal growth.

More than 70% foreign teachers for clinical medical Subjects

AIU – More Than a University, a Family.

Parents communication and Support

At our university, we recognize that effective communication and support between parents and educational institutions are essential for fostering student success. We are committed to maintaining open lines of communication to ensure that parents are informed and engaged in their child's academic journey

Regular Updates:

We keep parents informed through emails and other means about their child's progress.

Feedback

Mechanism:

We encourage parents to share their observations and concerns. This collaborative approach fosters a supportive environment where parents feel valued and involved in their child's education.

We believe "Engaged parents help boost their children's academic performance."

ADMISSION GUIDELINES

ELIGIBILITY CRITERIA

Minimum Education Requirement: Applicants are required to possess at least a full secondary education (12 years). This documentation must be provided and verified prior to enrollment.

Application Process

Evaluation Process: The submitted documents will be reviewed for authenticity and completeness by the admissions department of International relations.

Issuance of Admission Letter: Upon successful evaluation, an official Admission Letter will be issued to the student. This document is essential for further processes and must be kept secure.

The guidelines outlined above may be amended based on changes in legislation governing education in Uzbekistan or updated directives from the Ministry of Higher Education, Science, and Innovation. Students are encouraged to stay informed about policy adjustments that may affect their admission or residency.

VISA APPLICATION PROCESS

Telex Application

AIU will apply for a telex, which is a formal request to the Uzbek Embassy for visa issuance.

Visa Acquisition

Students must obtain their visa through the Embassy of Uzbekistan in their country of residence after the telex has been approved.

Travel Planning

Once the visa is acquired, travel plan is finalized with the coordination with International relations department to agree upon a travel plan, including details such as the travel date, arrival logistics, and any transportation arrangements necessary upon arrival in Uzbekistan.

Conditions for enrollment

To successfully register at AIU, applicants must fulfill all the following conditions:

- **Submission of Required Documents:** All required documents must be provided completely and accurately.
- **Contractual Agreement:** Establish a formal educational contract with candidate to cover tuition and related fees.
- **Tuition Payment:** Complete the payment for the academic year or semester as agreed in the contract.

VISA RENEWAL AND REGISTRATION SUPPORT

Visa Support: Assistance with the application and renewal of study visas, ensuring compliance with all legal requirements.

Temporary Registration: Students must register their passports at the local passport office within three working days of their arrival in Uzbekistan.

Republic of Uzbekistan

Uzbekistan is a doubly landlocked country in Central Asia, south of Kazakhstan and north of Turkmenistan. It shares a small border with Afghanistan to the south. Its capital and largest city is Tashkent. The country is characterized by a hot, dry climate with much of its area consisting of flat, sunbaked lowlands, though it also has mountains in the east.
